

**KAYAKS2FISH**

**OUTRIGGER INSTRUCTIONS**

STEP 1  
PLACE THE CENTRE BAR INTO THE ALLOCATED  
SLOT OR BRACKET.

STEP 2  
MARK THE CENTRE POLE WITH A SMALL DOT WHERE  
THE CENTRE SCREW WOULD SIT WITH THE PLATE  
FOR THE STANDARD INSTALLATION OR  
THE BRACKET FOR NON K2F KAYAKS.

STEP 3  
REMOVE THE CENTRE POLE FROM THE KAYAK.

STEP 4  
DRILL A HOLE THROUGH THE CENTRE POLE  
AT THE MARKED POINT

*Please Note: If you are planning on installing a motor block you may need to shift the centre pole further to the left or right to ensure enough room for the motor.*

STEP 5  
PLACE CENTRE POLE BACK ON THE KAYAK.

STEP 6  
INSERT THE KEYED S BARS INTO THE CENTRE POLE .

STEP 7  
ADJUST THE OUTRIGGER TO THE CORRECT POSITION.

STEP 8  
MARK A DOT THROUGH YOUR PREVIOUS HOLE ONTO  
THE S POLES.

STEP 9  
REMOVE THE S POLES AND DRILL THROUGH THEM IN  
THE MARKED SPOT ALL THE WAY THROUGH.

STEP 10  
PLACE THE S POLES BACK INTO THE CENTRE BAR AND  
SCREW DOWN THE MOUNTING PLATES.

*Please Note: How far you have the outriggers out from the kayak is a personal preference. The further out the outriggers are from the kayak the more stable it is. The closer they are to the kayak the more compact the kayak will be.*

STEP 11  
SCREW THE LONG SCREW DOWN THROUGH  
THE POLES INTO THE CENTRE BRASS INSERT.

STEP 12  
ATTACH THE PODS ON EITHER END AND  
SCREW ON WITH INCLUDED SCREWS.
